

LABORATORY TEST REPORT

Patient Name **Mrs M NAVATHA**

Age : 27 Year(s) Gender : Female

Sample ID : 18750271

Sample Type : Tissue

Patient ID : 1970154

Ref. Doctor :

Ref. Customer :

Lab Code : CPL-TS-1355

Sample Collection Date : 2024-03-28 00:00

Registration Date : 2024-03-28 08:15

Approved Date : 2024-04-08 11:07

HISTOPATHOLOGY

Biopsy - Small Specimen :

CLINOVA REF.ID : (CPL/HP/1686/24)

Specimen Details : Polypectomy done.

Clinical Diagnosis : Cervical polyp.

Gross Examination : Received one labelled bottle containing two grey white cyst like soft tissue measuring 0.8 cm. A/E.1 block.

Microscopic Examination : Sections studied from cervix shows ecto and endocervix. Ectocervix lined by stratified squamous epithelium, endocervix shows endocervical glands, stroma and chronic inflammation. No evidence of any dysplasia. No evidence of polyp.

Conclusion : Non specific cervicitis.

Remarks : Correlate clinically.
